# Azure Application Development

- Azure Storage and Data platforms
- Azure Application platforms
- Application and Data Security
- Implement Communications
- Azure VMs and Containers
- Logging and Monitoring

# AZ-204

- Exam AZ-204:

<https://docs.microsoft.com/en-us/learn/certifications/exams/az-204>

- Skills measured :

<https://query.prod.cms.rt.microsoft.com/cms/api/am/binary/RE4oZ7B>

# Azure Storage and Data Services

- Azure Storage Accounts
- Azure Cosmos DB
- Azure SQL Database
- Azure Cache for Redis

# Azure VMs and Containers (IaaS)

- Azure VMs
- Running containers in Azure (ACR, ACI, AKS, Azure Container Apps)

---

# Azure Application Platforms

- Azure App Services
- Function Apps
- Logic Apps

---

# Application and Data Security

- Azure Active Directory (AAD)
- RBAC and Managed Identity (MSI)
- Azure Key Vault

# Implement Communications

- Azure Storage Queues
- Azure Service Bus Queues and Topics
- Azure Event Hubs
- Azure IoT Hub
- Azure Event Grid

---

# Logging and Monitoring

- Alerts and Metrics
- Application Insights
- Azure Log Analytics Workspace

# Azure Storage and Data Services

---

# Azure Storage Account

Contains all Azure Storage data objects, including blobs, file shares, queues, and tables.

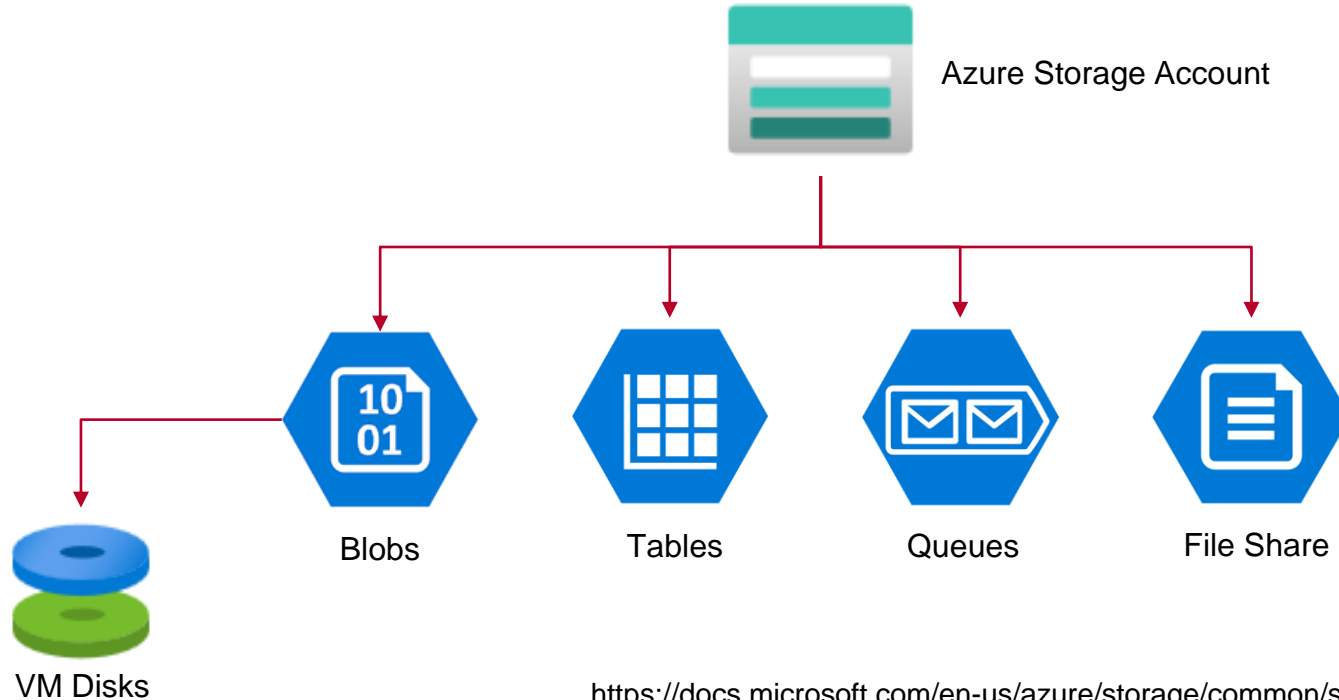

---

# Azure Storage Account

- Accessible from around the globe over HTTP(S)
- Store blobs, tables, queues, and file shares
- Access via public and private endpoints
- Financially-backed SLA
- Security-in-depth (firewall, in transit, at rest)

# Azure Storage Services

<https://docs.microsoft.com/en-us/azure/storage/common/storage-introduction>

# Azure Storage Account: Blobs

A scalable object store for text/binary files (unstructured data). Also includes support for big data analytics through Data Lake Storage Gen2

# Azure Storage Account: Tables

Stores non-relational structured data (structured NoSQL) in the cloud, providing a key/attribute store with a schema-less design

<https://docs.microsoft.com/en-us/azure/storage/tables/table-storage-overview>

# Azure Storage Account: Queues

- Stores a large number of messages in a queue data structure
- A queue message can be up to 64 KB in size (use Service Bus for bigger messages)
- Create a backlog of work to process asynchronously

# Azure Storage Account: Files

- File shares in the cloud that are accessible via the industry standard Server Message Block (SMB) protocol, Network File System (NFS) protocol, and Azure Files REST API

---

# Storage Account Redundancy Option

- Locally redundant storage
- Zone-redundant storage
- Geo-redundant storage
- Geo-zone-redundant storage

---

# Azure Cosmos DB

- A fully-managed NoSQL database for modern app development
- Azure Cosmos DB for NoSQL
- Azure Cosmos DB for MongoDB
- Azure Cosmos DB for Apache Cassandra
- Azure Cosmos DB for Apache Gremlin
- Azure Cosmos DB for Table
- Azure Cosmos DB for PostgreSQL

# Azure Cosmos DB Consistency

# Azure Cosmos DB Multi-region Writes

---

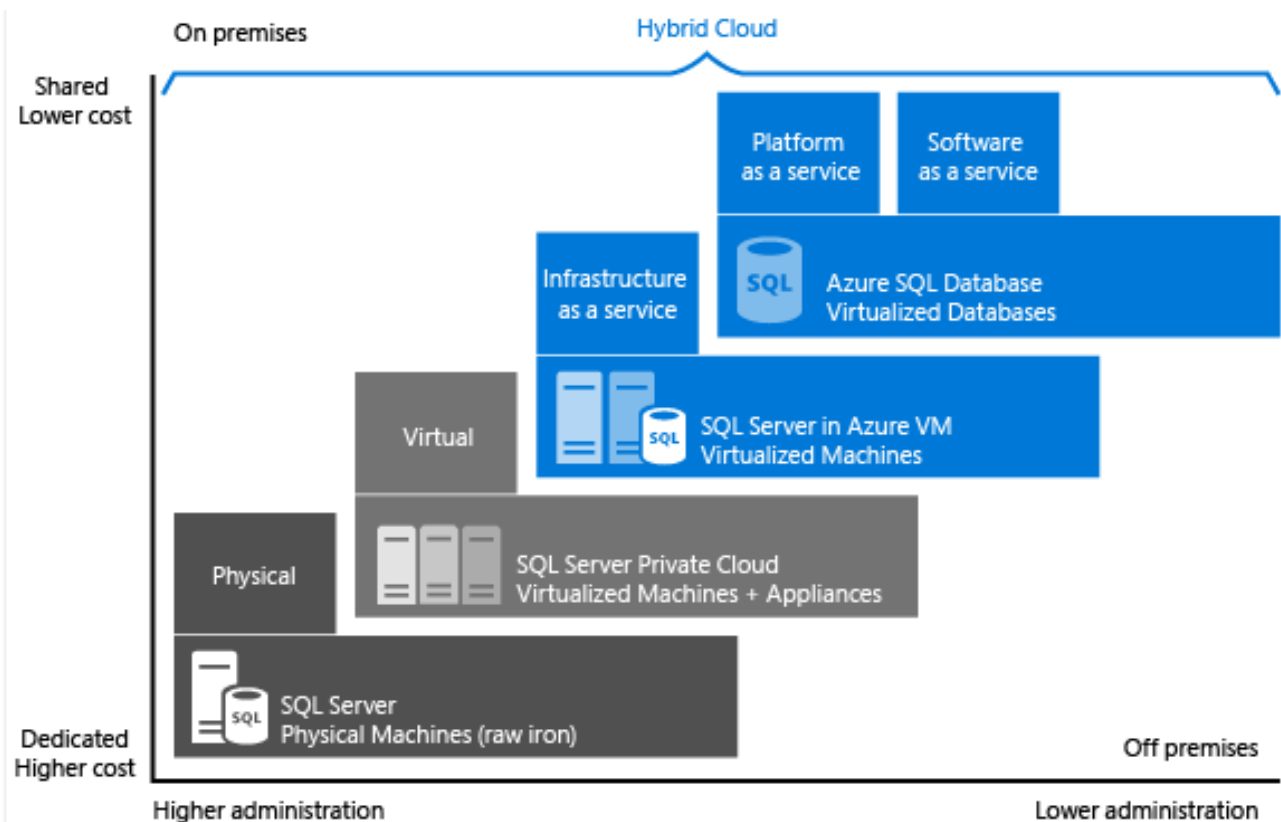

# Azure SQL

- Azure SQL is a family of managed, secure, and intelligent products that use the SQL Server database engine in the Azure cloud

# Azure SQL

---

# Azure SQL (Database)

- Azure SQL Database offers the following deployment options:
- Single database
- Elastic pool

---

# Azure Cache for Redis

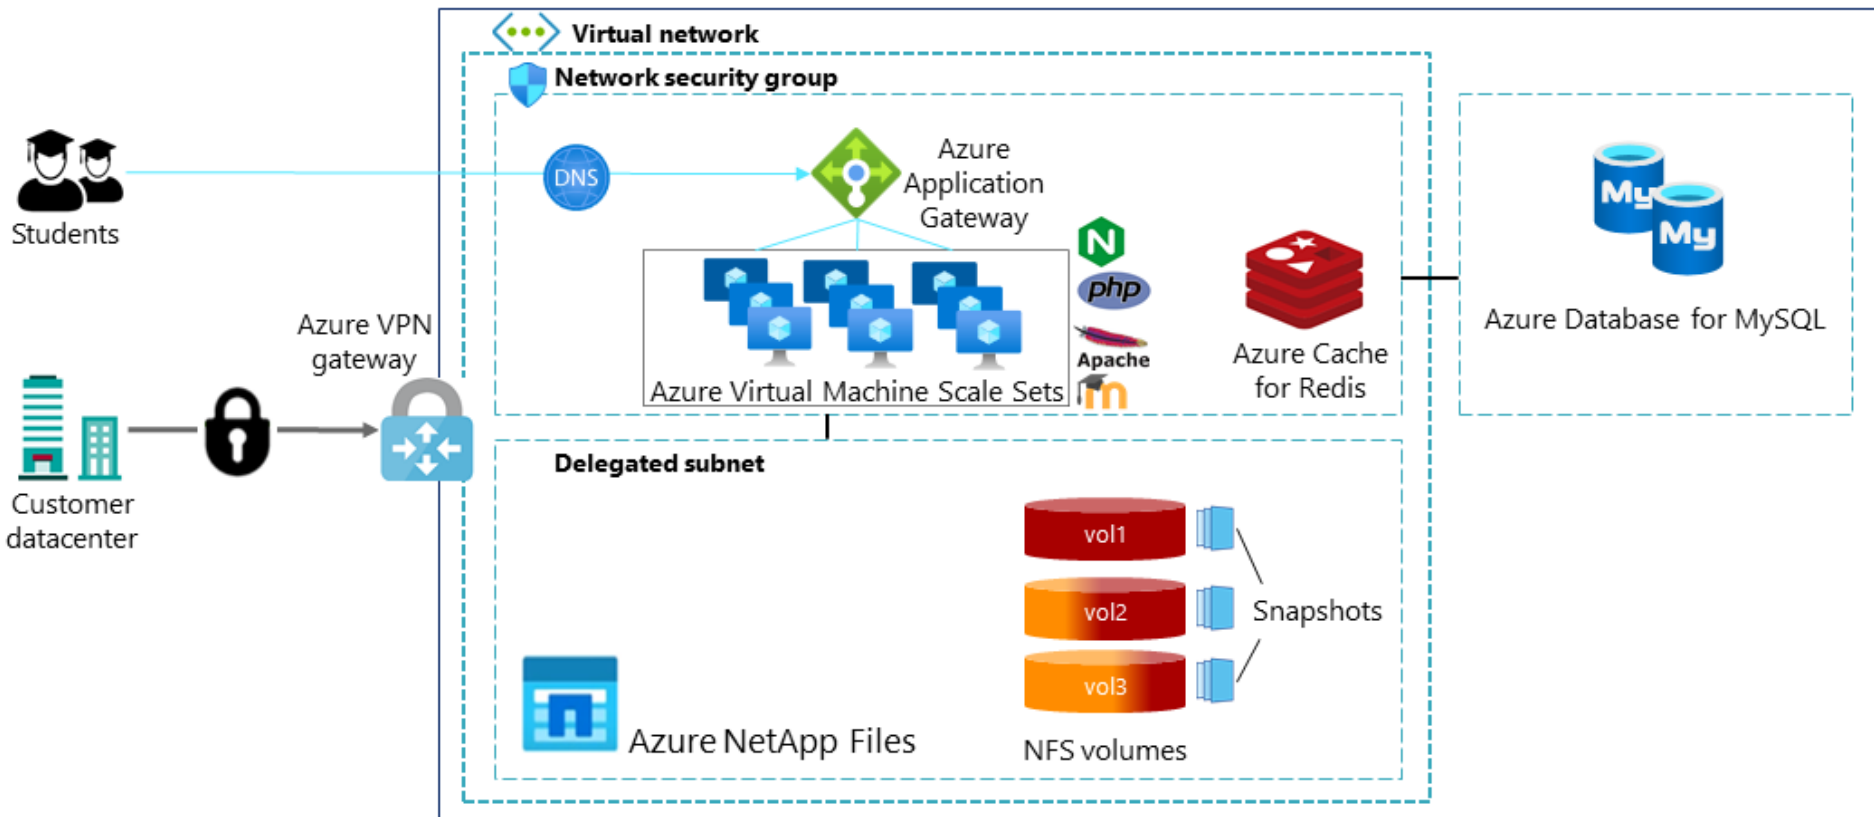

- Azure Cache for Redis provides an in-memory data store based on the Redis cache engine.
- Basic
- Standard
- Premium
- Enterprise
- Enterprise Flash

- 1: Determine whether the item is currently held in the cache.
- 2: If the item is not currently in the cache, read the item from the data store.
- 3: Store a copy of the item in the cache.

## Azure region

# Hosting Azure Applications

---

# App Services

- Azure App Service is an HTTP-based service for hosting web applications, REST APIs, and mobile back ends
- Windows and Linux
- Shared , dedicated and isolated compute

---

# Azure Functions

- Azure Functions is a serverless solution that allows you to host your applications in Azure
- Triggers, Input & output bindings
- Durable Functions is an extension of Azure Functions that lets you write stateful functions in a serverless compute environment.

---

# Azure Logic Apps

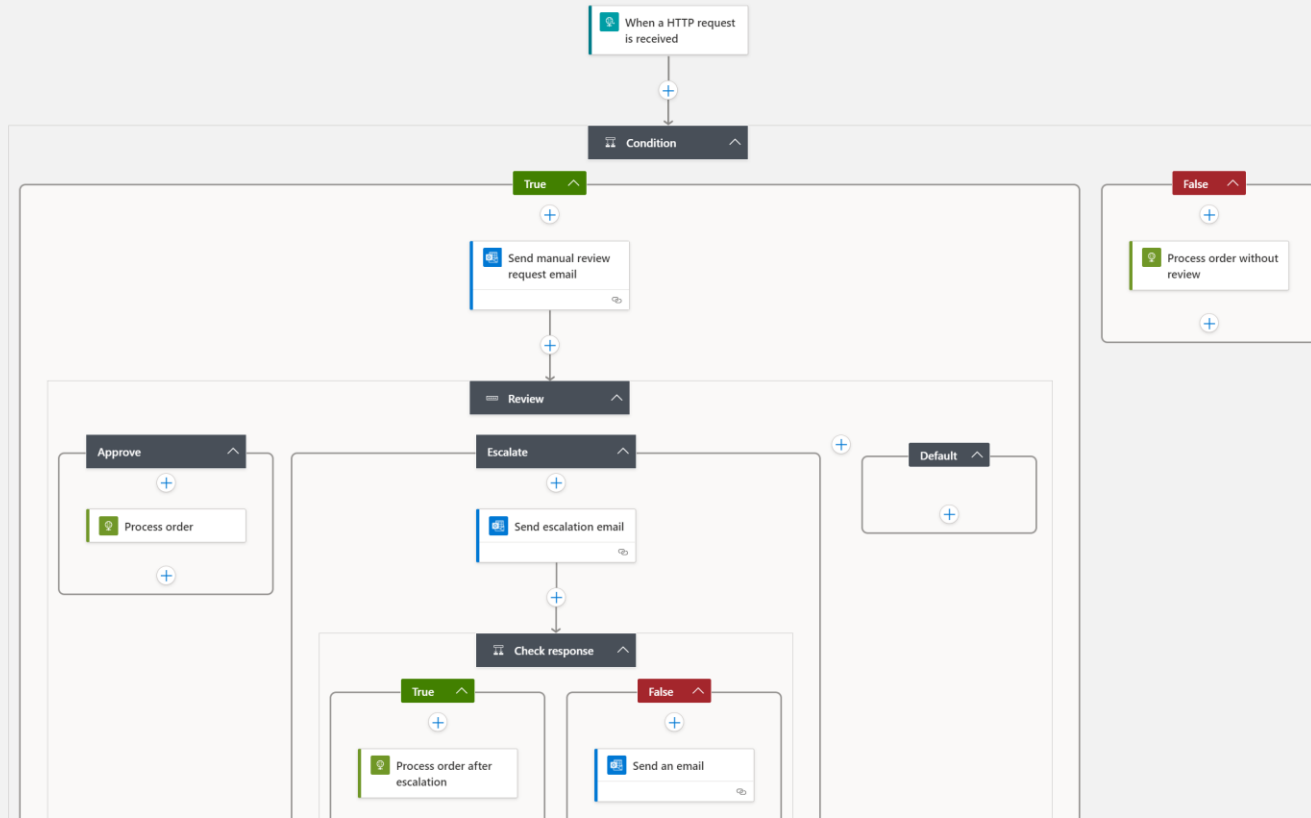

- A cloud service that helps you schedule, automate, and orchestrate tasks, business processes, and workflows when you need to integrate apps, data, systems, and services across enterprises or organizations.
- Has a visual designer, also use ARM-like syntax to develop

Home > Resource groups > myResourceGroup > myStandardLogicApp > example-workflow

## example-workflow | Designer

Save Discard Info

# Application and Data Security

---

# Azure Active Directory

- Azure Active Directory (Azure AD) is Microsoft's cloud-based identity and access management service.

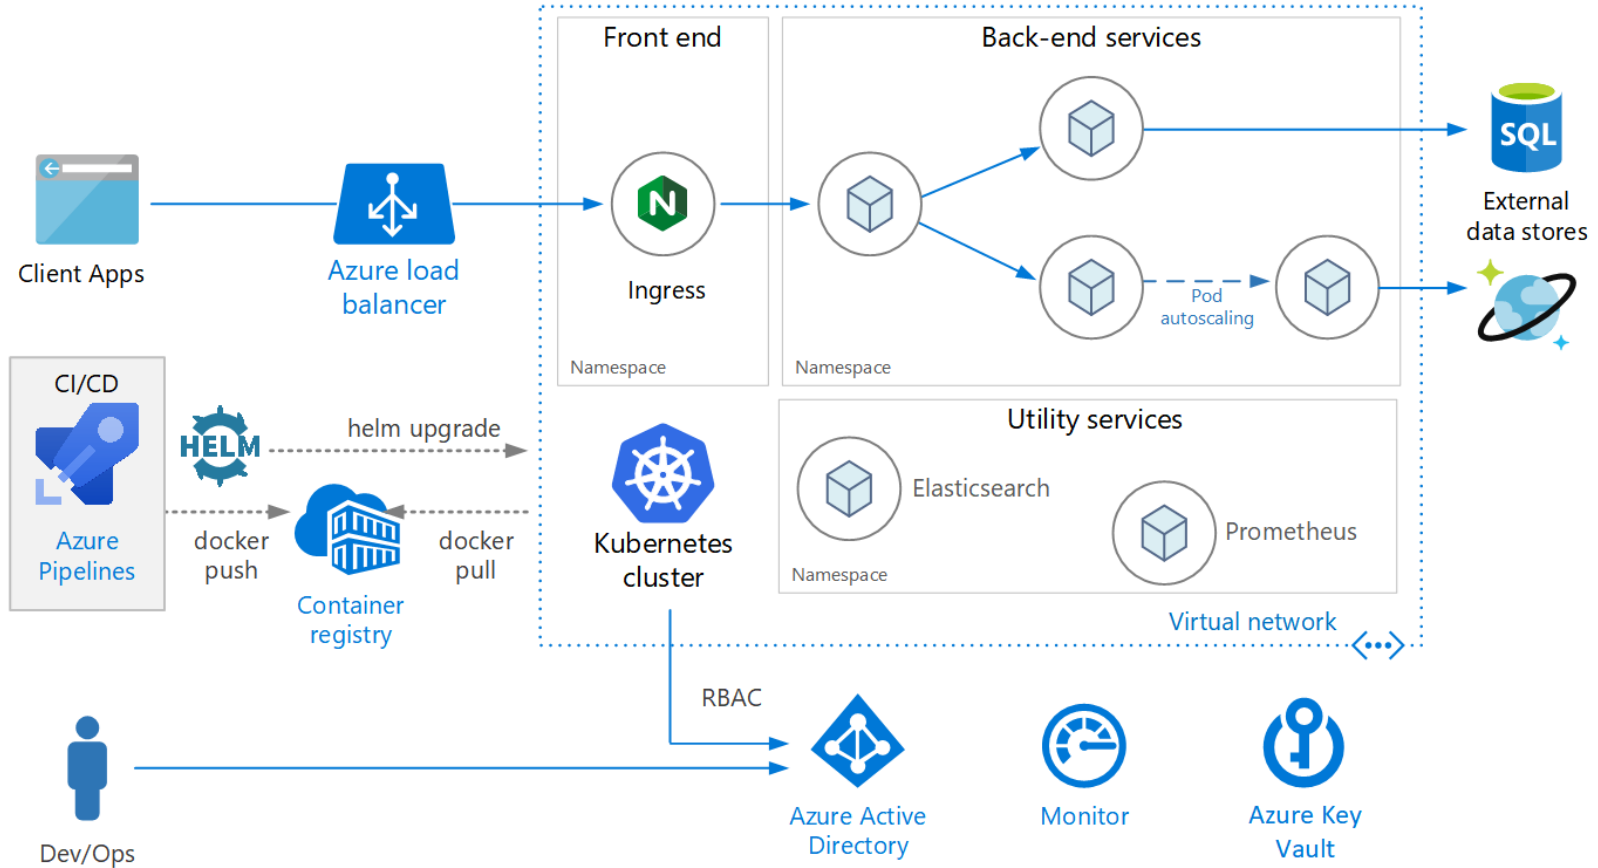

# Azure Active Directory

- Azure Active Directory (Azure AD) is Microsoft's cloud-based identity and access management service.
- Define identities for humans and processes
- Grant access over resources/application to the above identities using RBAC/Access Policies

Azure Kubernetes  
Service (AKS)

# Managed Identity

- Is an Azure Active Directory (Azure AD) service
- Eliminates the need to manage credentials. (App id, secrets, tenant ids, etc.)
- Provide an identity for applications and services to use when connecting to resources that support Azure Active Directory (Azure AD) authentication

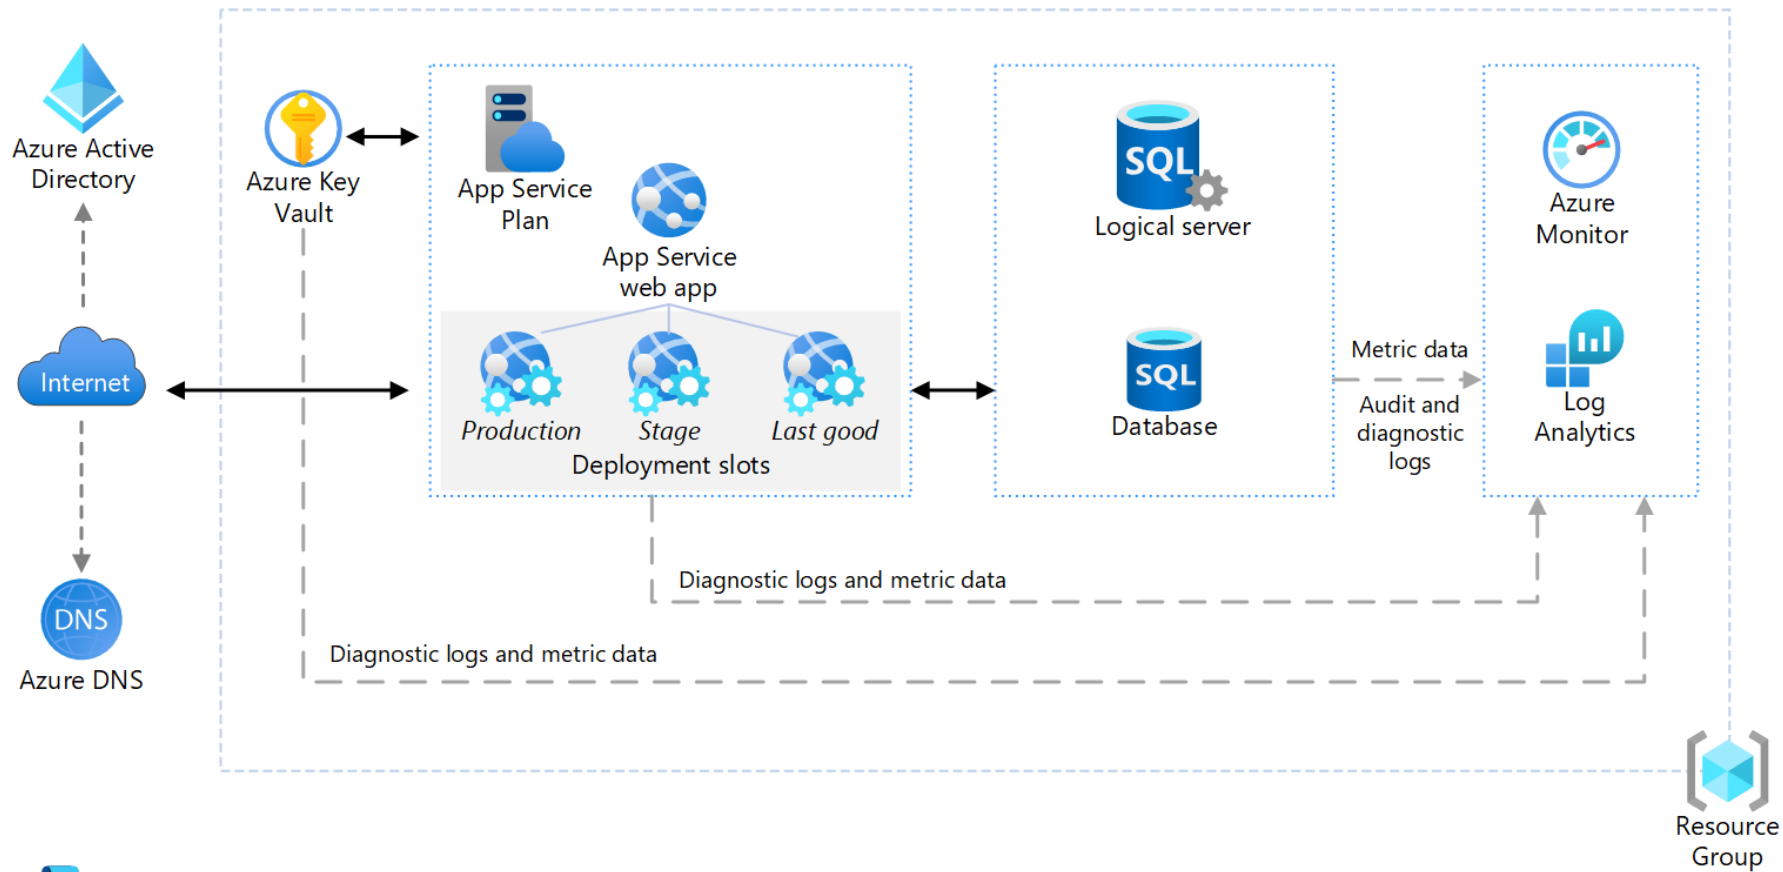

---

# Azure Key Vault

- Helps securely store secrets, keys and certificates in Azure
- Secrets Management (tokens, passwords, API keys, etc.)
- Key Management (encryption keys used to encrypt your data)
- Certificate Management (private TLS/SSL certificates)

# Implement Communications

---

# Azure Storage Queues

- A service for storing large numbers of messages
- A queue message can be up to 64 KB in size
- FIFO is intended but not guaranteed
- More affordable comparing to Azure Service Bus queues.

---

# Azure Storage Queues

- A service for storing large numbers of messages
- A queue message can be up to 64 KB in size
- FIFO is intended but not guaranteed
- More affordable comparing to Azure Service Bus queues.

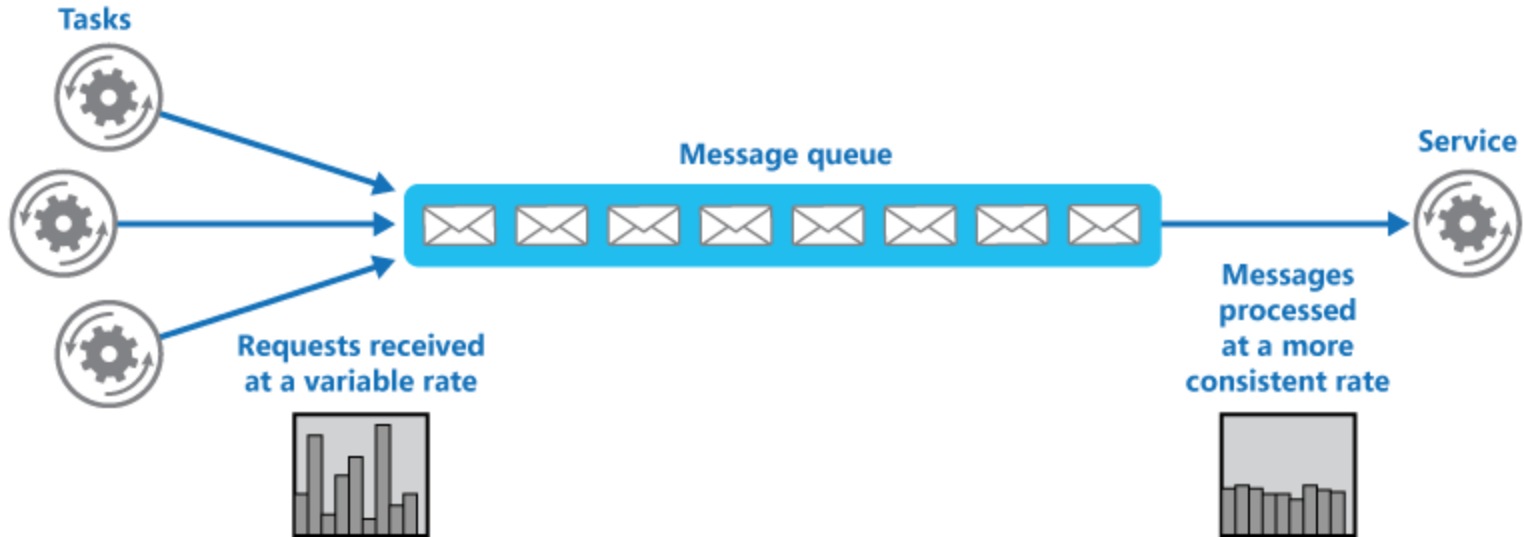

---

# Service Bus Queues and Topics

- Azure Service Bus supports a set of cloud-based, message-oriented middleware technologies including reliable message queuing and durable publish/subscribe messaging.
- Queues (single receiver)
- Topics (multiple subscribers)

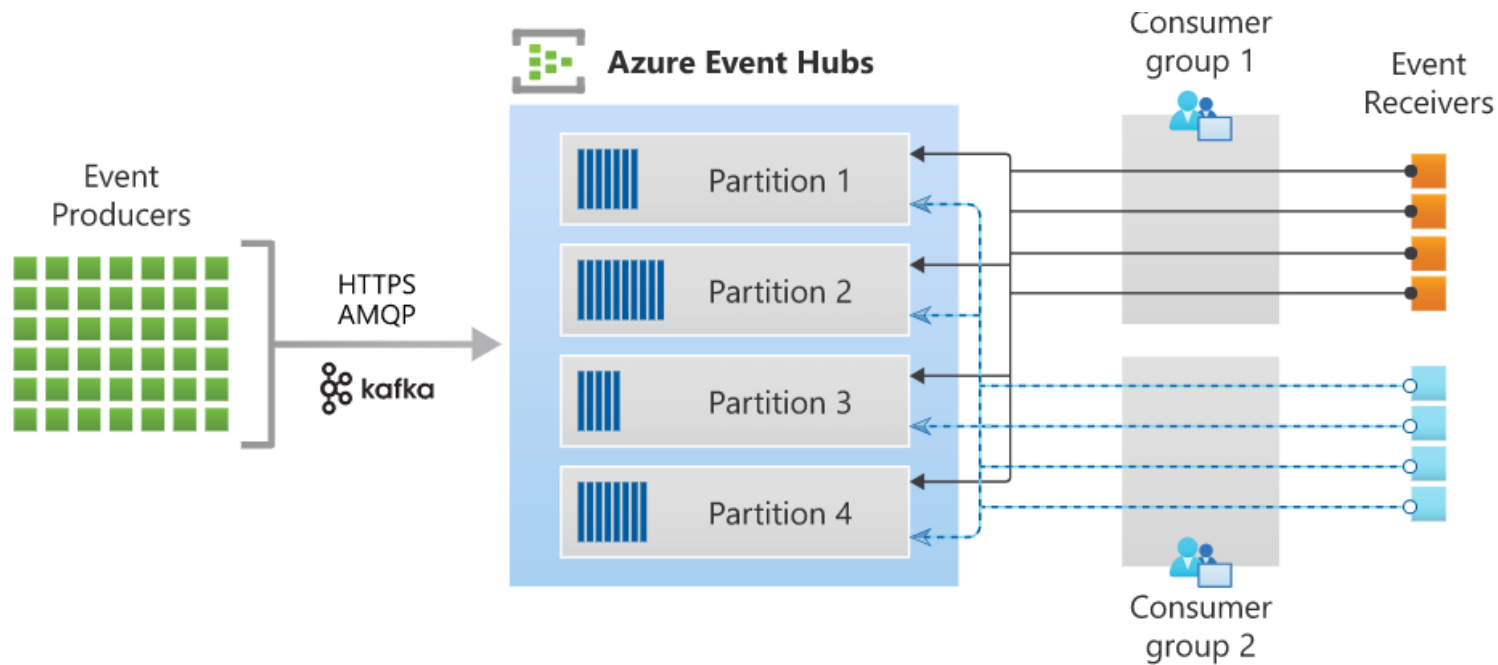

---

# Azure Event Hubs

- Azure Event Hubs is a big data streaming platform and event ingestion service.
- Anomaly detection (fraud/outliers)
- Application logging
- Transaction processing
- User telemetry processing
- Device telemetry streaming

# Azure Event Hubs

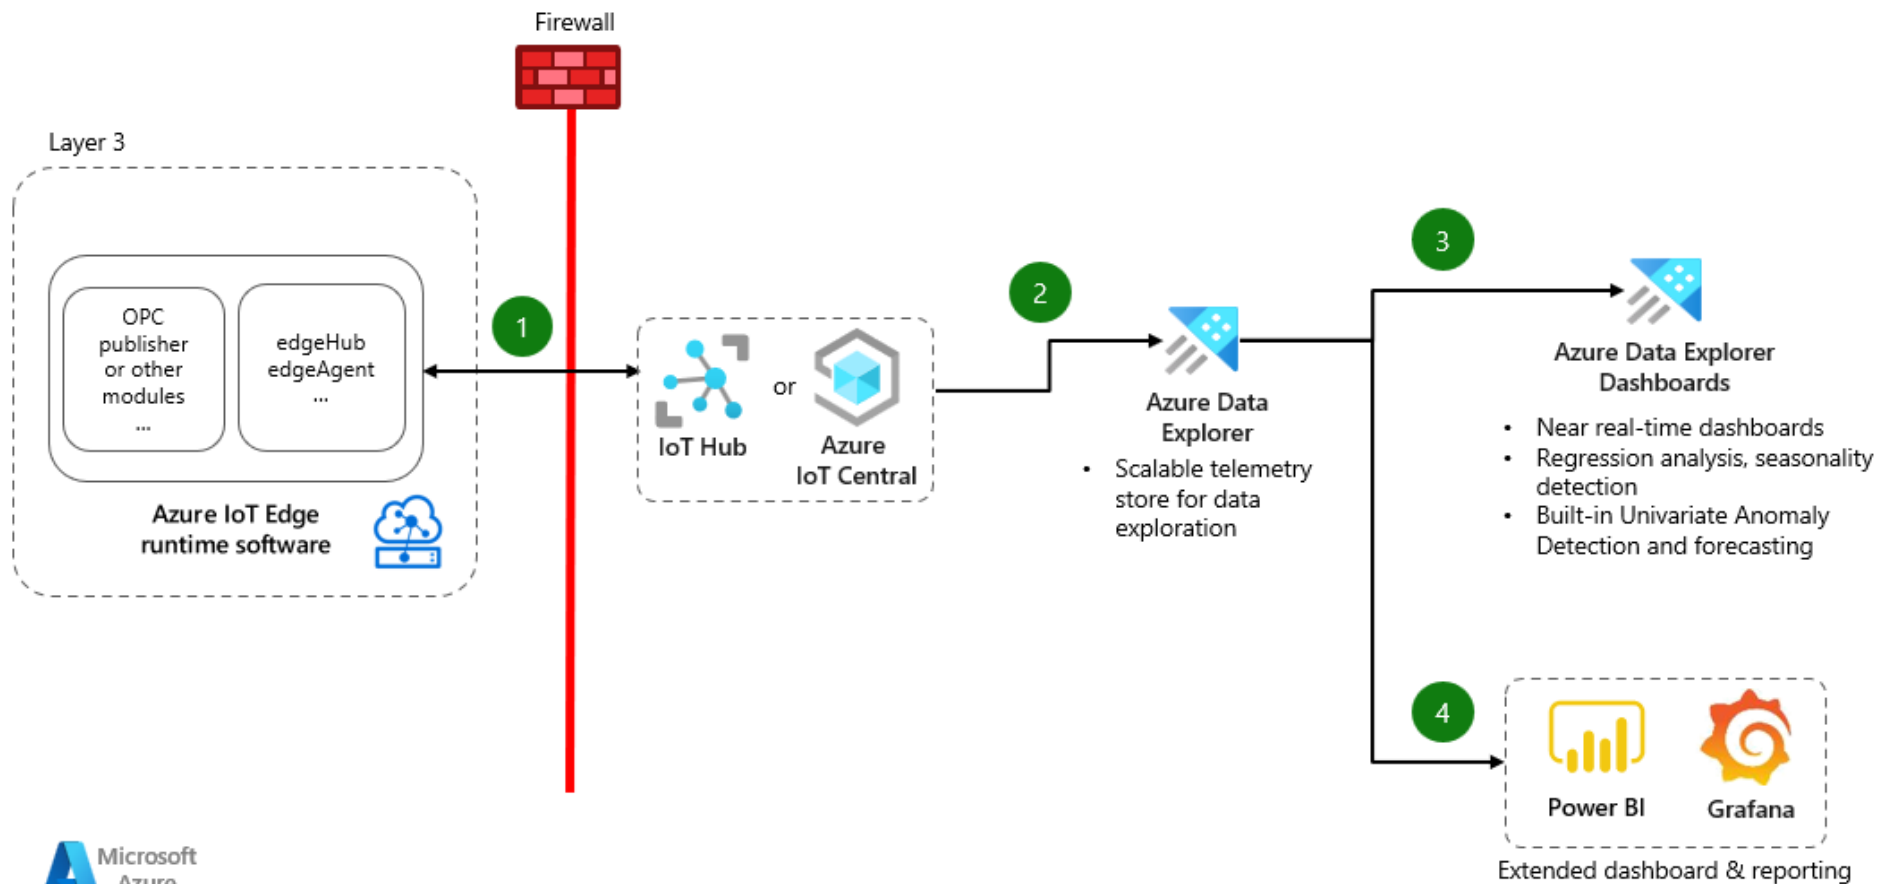

---

# Azure IoT Hub

- A managed service that acts as a central message hub for communication between an IoT application and its attached devices.
- Device-to-cloud (d2c) messaging
- Cloud-to-device (c2d) messaging
- Ingesting millions of messages per minute

---

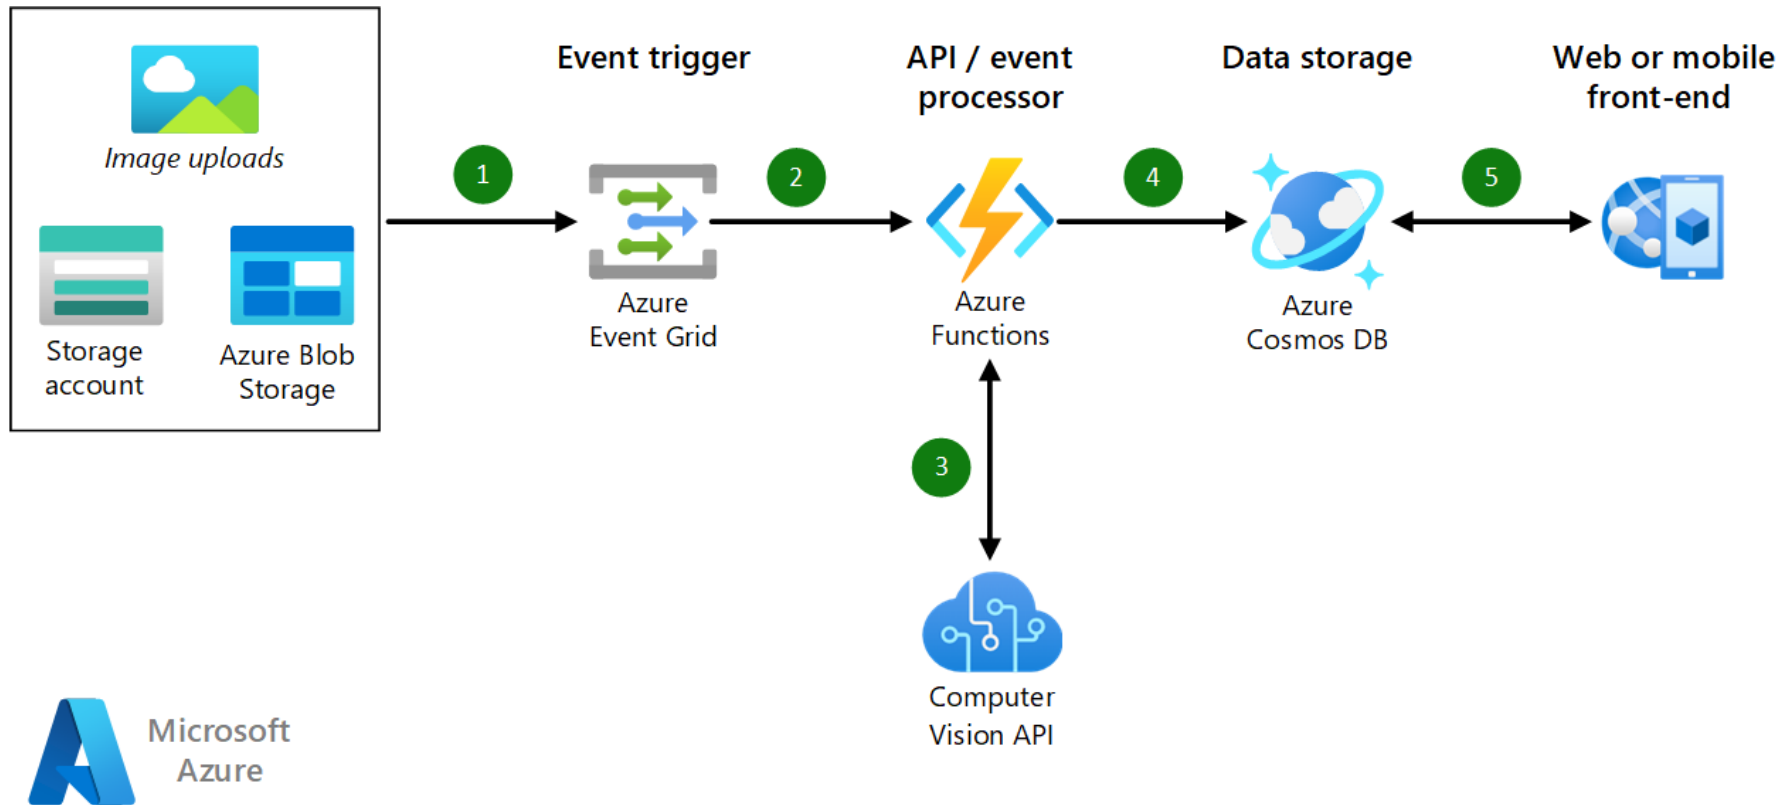

# Azure Event Grid

- Azure Event Grid allows you to easily build applications with event-based architectures.
- Event sources (Azure App Configuration, Azure Blob Storage, Azure Communication Services, ...)
- Event handlers (Azure Functions, Event Hubs, etc.)

# Azure Event Grid

# Azure VMs and Containers

---

# Azure VMs

- An Azure VM gives you the flexibility of virtualization without having to buy and maintain the physical hardware that runs it.
- Host VMs in Azure

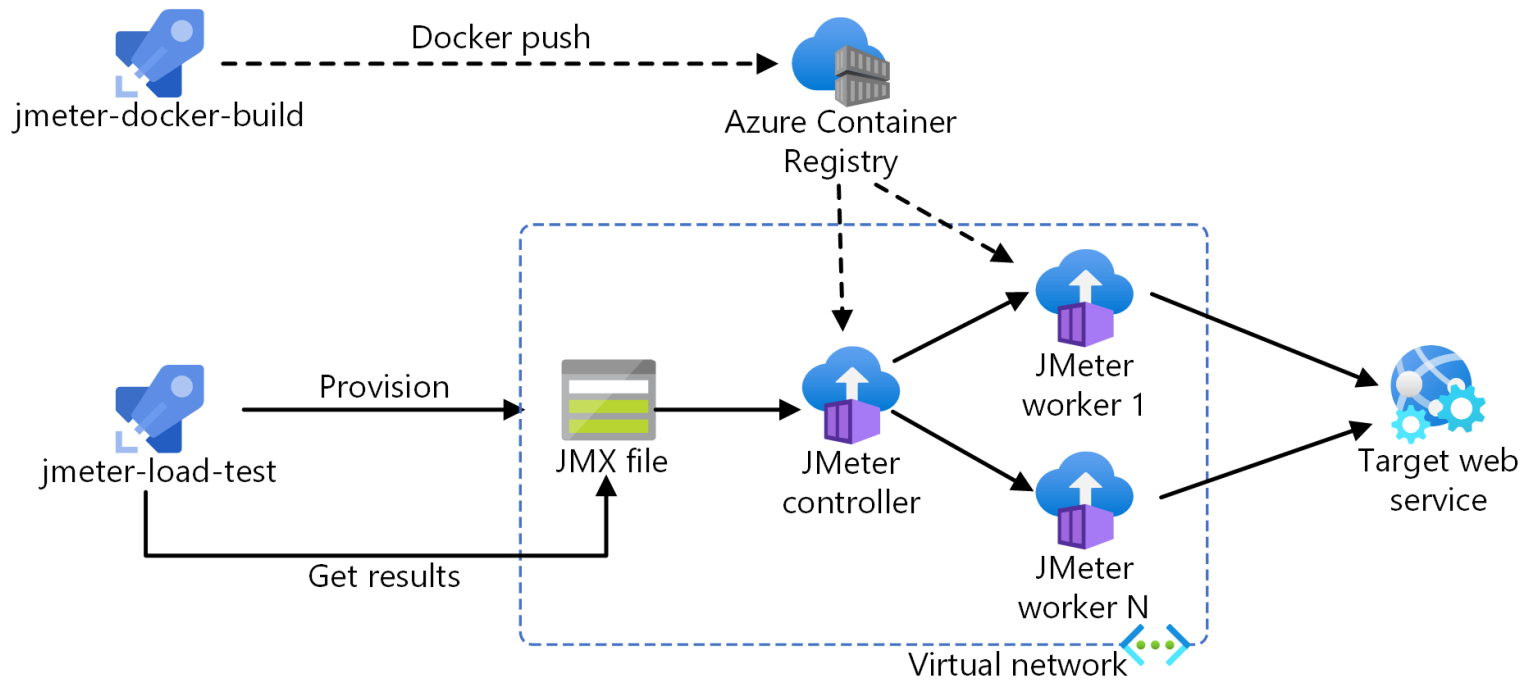

---

# Hosting Containers in Azure

- Azure Container Registry (ACR) : build, store, and manage container images and artifacts in a private registry
- Azure Container Instances (ACI): host isolated containers
- Azure Kubernetes Service (AKS): simplifies deploying a managed Kubernetes cluster in Azure
- Azure Container Apps (ACA): Run microservices and containerized applications on a serverless platform.

# Logging and Monitoring

---

# Azure Monitor

Helps you collect, analyze, and act on telemetry from your cloud and on-premises environments.

<https://docs.microsoft.com/en-us/azure/azure-monitor/overview>

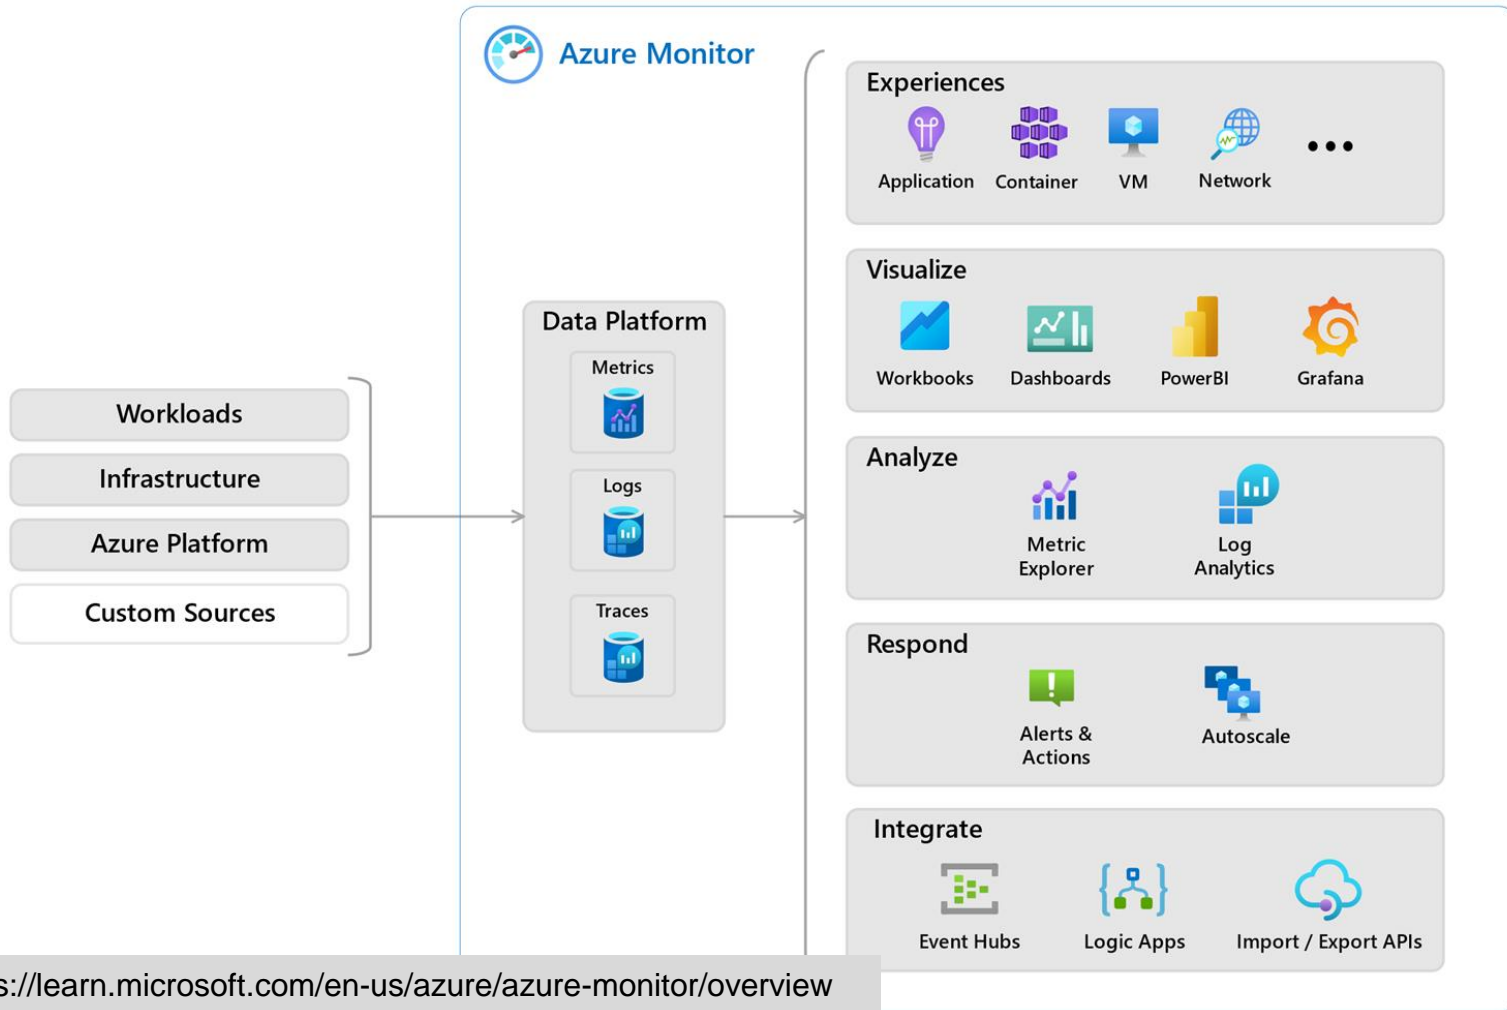

---

# Azure Monitor

- Detect and diagnose issues across applications and their dependencies using **Application Insights**.
- Detect and correlate infrastructure issues with **VM insights** and **Container insights**.
- Drill into your monitoring data with **Log Analytics**
- Collect resource performance data using **Azure Monitor Metrics**.

<https://learn.microsoft.com/en-us/azure/azure-monitor/overview>

---

# Azure Monitor Alerts and Actions

- Alerts notify you of possible problems with your resources or infrastructure.
- Actions help you address the issues

---

# Azure Monitor Alert Types

- Metric alerts
- Log alerts
- Activity log alerts
- Smart detection alerts (Web application - Application Insights)

---

# Azure Monitor Application Insights

Application Insights is a feature of Azure Monitor that provides extensible application performance management and monitoring for **live web apps**

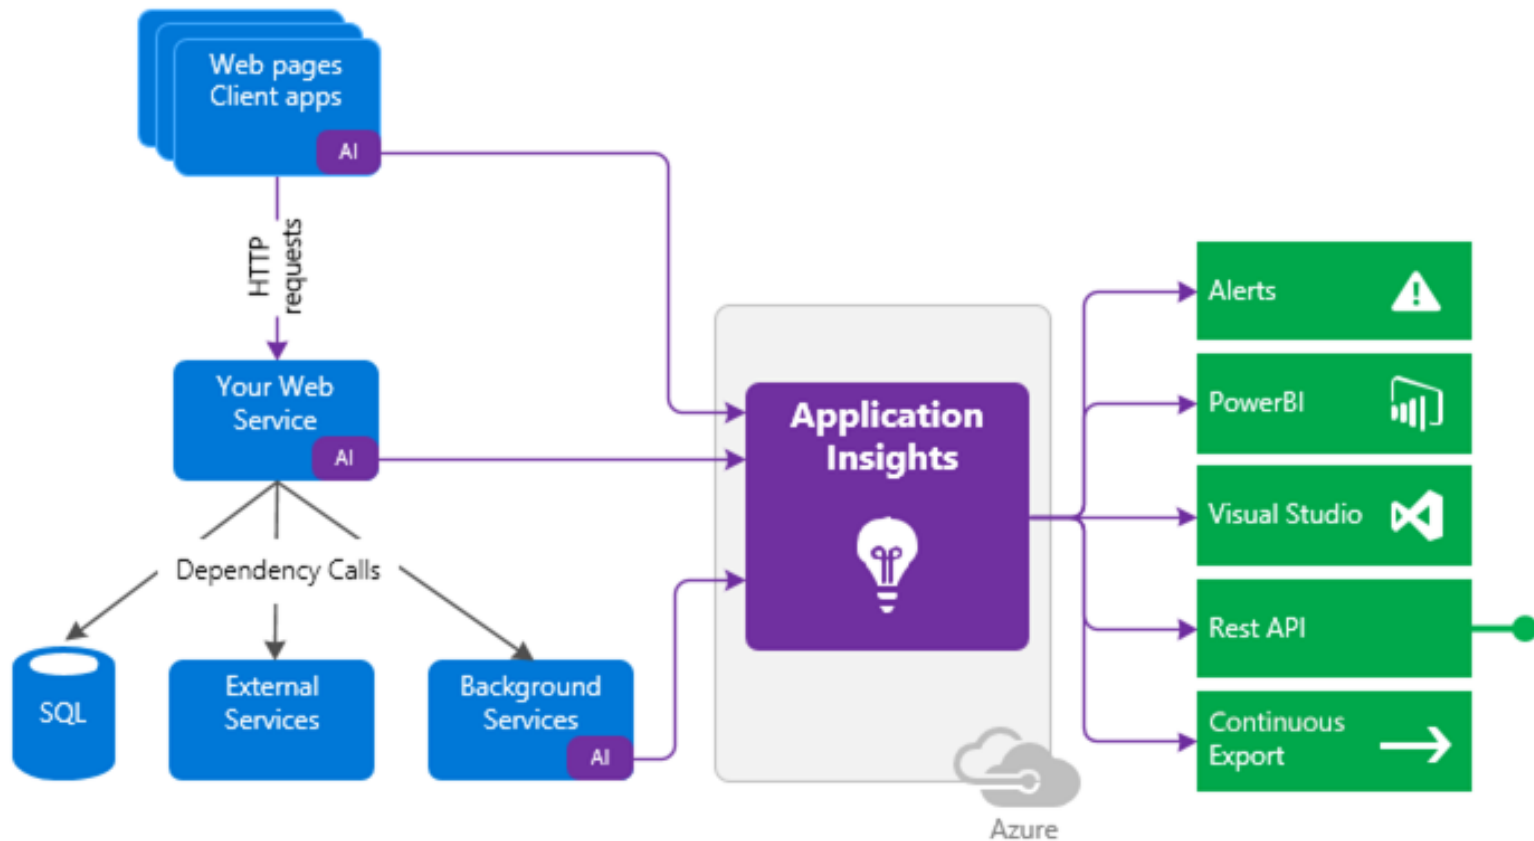

---

# Azure Monitor Application Insights

- Automatically detect performance anomalies
- Help diagnose issues by using analytics tools
- See what users do with apps
- Help to improve app performance and usability
- Supports many platforms, including .NET, Node.js, Java, and Python

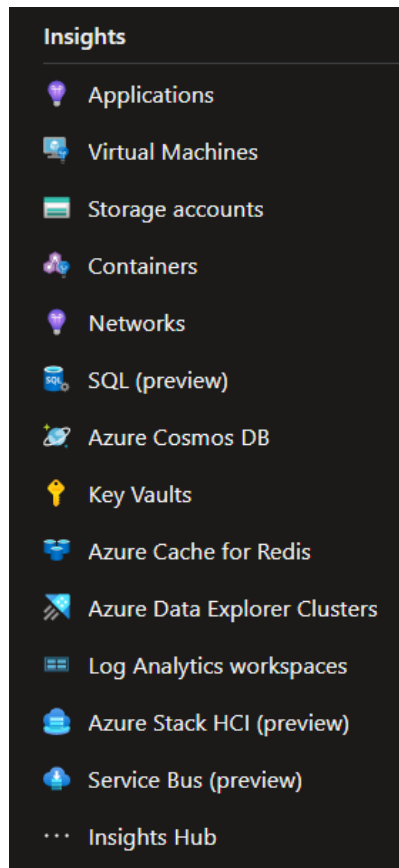

<https://docs.microsoft.com/en-us/azure/azure-monitor/app/app-insights-overview>

# Insights

- Azure Monitor Application Insights
- Azure Data Explorer insights
- Azure Container Insights
- Azure Cosmos DB Insights
- Azure Service Bus Insights
- Azure Storage Insights
- Azure Network Insights
- Azure VM Insights
- Azure Virtual Desktop Insights
- ...

---

# Azure Log Analytics

- Log Analytics is a tool in the Azure portal used to edit and run log queries with data in Azure Monitor Logs.

# The Exam

# AZ-204

- Exam AZ-204:

<https://docs.microsoft.com/en-us/learn/certifications/exams/az-204>

- Skills measured :

<https://query.prod.cms.rt.microsoft.com/cms/api/am/binary/RE4oZ7B>

# Schedule exam

## Exam AZ-204: Developing Solutions for Microsoft Azure

United States

**Languages:** English, Japanese, Chinese (Simplified), Korean, French, German, Spanish, Portuguese (Brazil), Russian, Chinese (Traditional), Italian, Indonesian (Indonesia), Arabic (Saudi Arabia)

**Retirement date:** none

This exam measures your ability to accomplish the following technical tasks: develop Azure compute solutions; develop for Azure storage; implement Azure security; monitor, troubleshoot, and optimize Azure solutions; and connect to and consume Azure services and third-party services. You will be able to select the code language (C# or Python) that's included in the questions when you launch the exam.

**\$165 USD\***

Price based on the country or region in which the exam is proctored.

Schedule exam >

Official practice test for Developing Solutions for Microsoft Azure

All objectives of the exam are covered in depth so you'll be ready for any question on the exam.

AZ-104: Microsoft Azure Administrator

Where do you want to take your exam?

At a test center

Online at my home or office

I have a Private Access Code

Where do you want to take your exam?

At a test center

Online at my home or office

I have a Private Access Code

Prepare for your online exam at your home or office

### Your computer

Use a personal computer that has a reliable webcam and internet connection.

Run [system test](#).

### Your testing space

The room should be a distraction-free, private place.

See [acceptable spaces](#) and view permitted [comfort aid list](#).

### Your photo ID

We'll verify your government-issued identification (ID) when you arrive for your exam.

Review [admission & ID policies](#)

### What to expect

Check in for your OnVUE exam 30 minutes before your appointment time.

Watch our [short video](#) to get familiar with the process.

### Questions?

Check out the [OnVUE FAQs](#) and [minimum technical requirements](#).

## Cart

[Review and confirm](#) contact information to avoid issues on test day.

Description	Details	Price	Actions
		165.00	<a href="#">Remove</a>

### Available Products

In addition to scheduling your exam, you might be interested in the following products.

**Microsoft Official Practice Test powered by MeasureUp - 30 day online access**  
Get a discount on available Microsoft Official Practice Test for Microsoft certification exams (Fundamentals, Role-based, or Specialty) 30-day online access.

**Special offer:** Regularly priced at USD 99.00! [Click here for details](#)

[More Details](#)

USD 80.00

[Add to Order](#)

# It's time to test your system

Order #: 0064-8802-7606

Your appointment is confirmed! An order confirmation containing important exam day information has been sent to: zaalion@gmail.com

## What's next?

Run a system test

We need to verify that the computer and internet connection you plan to use on exam day meet the [minimum requirements](#) for online testing. It'll just take 5 minutes to run:

Equipment and internet connection checks

Exam simulation

### Description

### Details

### Order Information

### Price

165.00

## System Test

☐ I confirm that on my exam day I will be using this same testing space, computer, and internet connection.

**Alert!** Work computers generally have more restrictions that may prevent a successful test. Ensure you are not behind a corporate firewall, and shut down any **Virtual Private Networks (VPNs)** or **Virtual Machines**.

### 1. Copy Access Code

Click '**Copy Access Code**'.

This code will authorize you to perform a system test.

690-635-235

Copy Access Code

### 2. Download OnVUE

Click '**Download**'.

Download

### 3. Run OnVUE

Run the OnVUE application from your Downloads folder.
